The most populated app “ZOOM Cloud Meetings”

Zoom is a cloud founded video conferencing data from that can be applied for audio conferencing video conferencing meeting recording message sharing and life set Zoom is the most popular video centre in gene meeting with an easy Zoom user can choose to record session combine on project and share on another's screens all with one easy to use platform. Zoom found massive search during a dark time for the world and it will try to maintain to us position. Prioritizing user privacy and security over case of loss.

When this Zoom app company first launched in 2011, their situation was not very good. At first, their number was also very low. In 2012-2012, their number of users was only 1 million and in 2013 it stood at 40 million, then in 2014 their market share increased. US 63 63 million then no need to look back their condition has improved and we will try to find out more details. Zoom was founded by Eric Yuan, a former corporate vice president for Cisco Webex in 2011.

Zoom established partnerships with B2B collaboration software providers, such as Redbooth (then Teambox), and also created a program named Works with Zoom, which established partnerships with Logitech, Vaddio, and InFocus. In September 2013, the company raised \$6.5 million in a Series B round from Facebook, Waze, and existing investors. At that time, it had 3 million users. By June 2014, Zoom had 10 million users. On February 4, 2015, the company received US\$30 million in Series C funding from investors including Emergence Capital, Horizons Ventures (Li Ka-shing), Qualcomm Ventures, Jerry Yang, and Patrick Soon-Shiong. At that time, Zoom had 40 million users, with 65,000 organizations subscribed and a total of 1 billion meeting minutes since it was established. Over the course of 2015 and 2016, the company integrated its software with Slack, Salesforce, and Skype for Business. With version 2.5 in October 2015, Zoom increased the maximum number of participants allowed per conference to 50 and later to 1,000 for business customers. In November 2015, former president of RingCentral David Berman was named president of the company, and Peter Gassner, the founder and CEO of Veeva Systems, joined Zoom's board of directors.

This the member of Zoom user has grown rapidly because of covid 19. According to added 2.22 million people monthly active users as 2020 while in all of 2019 is added 1.99 million users.

Zoom meeting are the based of Jhoom Jhoom has in meeting chat for everyone or participate and can message is other privately in Zoom meeting you can even meet with clients or conduct interviews with remote candidates virtually.

This makes meeting remotely more human who is essential in order to help user field and stay connected video conferencing tools allow individual to meet and work together portable face to face. Firstly you have needed zoom account to attend is vomiting in a zoom meeting at first you login the zoom screen start you meeting as as the host by checking meeting and attend can join the meeting in Prison in you Jhoom of you can set your performs that with apply to every zoom meeting you attend you can record meeting to your device by zoom cloud meeting.

In January 2017, the company raised US\$100 million in Series D funding from Sequoia Capital at a US\$1 billion valuation, making it a so-called unicorn. In April 2017, Zoom launched a scalable telehealth product allowing doctors to host remote consultations with patients. In May, Zoom announced integration with Polycom's conferencing systems, enabling features such as multiple screen and device meetings, HD and wireless screen sharing, and calendar integration with Microsoft Outlook, Google Calendar, and iCal. From September 25-27, 2017, Zoom hosted Zoomtopia 2017, its first annual user conference. At this conference, Zoom announced a partnership with Meta to integrate Zoom with augmented reality, integration with Slack and Workplace by Facebook, and first steps towards an artificial intelligence speech recognition program.

On April 18, 2019, the company became a public company via an initial public offering. After pricing at US\$36 per share, the share price increased over 72% on the first day of trading. The company was valued at US\$16 billion by the end of its first day of trading. Prior to the IPO, Dropbox invested \$5 million in Zoom.

During the COVID-19 pandemic, Zoom saw a major increase in usage for remote work, distance education, and online social relations.[3] Thousands of educational institutions switched to online classes using Zoom. The company offered its services for free to K–12 schools in many countries. By February 2020, Zoom had gained 2.22 million users in 2020 — more users than it amassed in the entirety of 2019. On one day in March 2020, the Zoom app was downloaded 2.13 million times. Daily average users rose from about 10 million in December 2019 to about 200 million in March 2020, with 300 million daily meeting participants by the end of April 2020. This led to an increase in the company's stock price in early 2020, despite a general stock market downturn. Zoom stock went from less than \$70 per share in January 2020 to \$150 per share by the end of March, giving the company a market value of \$42 billion.

Zoom Cloud Meeting Is The Use Of Formatting Important Video Call For Work When You Make Video Call You Can Use Your Front Of Camera Active Or In Other People to your meeting with a unique link create meeting remotely for other users you want to connect with on other.

Zoom is a widely used cloud-based video conferencing service that permits the users to virtually interact with others either through video call or audio call. This software is mainly used by businesses to conduct various meetings while staying indoor. This is extremely helpful to get in touch with international clients and host meetings with them.

Zoom app is offered in both free and paid versions. The paid version has some additional features like you can add up to 1000 participants, record calls, and much more. Zoom is a very user-friendly application that offers high-quality HD video and audio along with collaboration facilities such as text chat and screen sharing. Moreover, you do not sign up for the app to join a Zoom meeting. However, in order to host a video conference, you are required to make your own personal account.

The Zoom app is accessible on all major desktop and mobile operating systems, including Windows, macOS, Android, and iOS. Let's dig in further by identifying the difference between Zoom Meeting and Zoom Room. Zoom meeting indicates a video conference meeting that is conducted via this app. Individuals can join Zoom Meetings through their smartphones and webcams. While Zoom Room is the physical hardware setup that allows the companies to organize and initiate Zoom Meetings from their conference rooms.

Download the Zoom app from the app store or through the website; both mobile and desktop versions are available.

If you are joining a video conference then simply join without signing up. But if you are planning to host a meeting then create a zoom account or sign up using your already existing Facebook, Google, or SSO account

After signing up, you can share your screen in a Zoom Room by inputting the meeting ID, commence Zoom Meetings, mute/unmute your mic, start/stop the video, send invitations to others so they can join the meeting, modify your screen name, do in-meeting chat, and start a cloud recording. Desktop users can also begin a local recording, generate polls, broadcast their Facebook live on Facebook, and much more. It is possible to use Zoom in other ways.

There is a Zoom Outlook plugin that's designed to work directly in your Microsoft Outlook. The users are offered with a Zoom button in the Outlook toolbar, allowing you to begin or schedule a Zoom meeting with a simple click.

There are a Zoom Chrome extension and Zoom Firefox add-on that let you schedule a Zoom meeting via Google Calendar.

Joining a video call conference through the browser is slightly difficult. But by using the web client link you can directly enter a meeting.

Although there are some useful aspects of the zoom app, there are some harmful aspects as well. Now we will try to know the details about them.

The Major disadvantages of using Zoom App have come up in terms of their working model (association with Chinese Servers) and a series of recent security breaches. Besides, several other

issues can easily frustrate a user. After incidents such as Zoom Bombing, many countries have restricted its use for conducting conferences in the wake of data theft.

In the new advisory, the Indian Ministry of Home Affairs has asked users, who would still like to use Zoom video conferencing App, to follow certain guidelines for safety purpose– including preventing unauthorized entry in the conference room, preventing an unauthorized participant to carry out malicious activity.

A denial-of-service (DOS) attack is exercised by hackers to make a machine or network resource unavailable to its intended user.

Such malfunction can also be dangerous for healthcare centres and professionals as the number of Zoom App Users had plunged during the COVID-19 pandemic.

And it offers 40 minutes of online meetings for free users and if you want more than 40 minutes then you have to buy it's paid version. By the way, everything has pros and cons and the most important pros of the are anyone can use it with ease. And it supports meeting/online classes of over 100 users at a time and they can interact with each other with the inbuilt chatting system.

The most prominent issue with Zoom is their security model but they are addressing these issues. Most audio/video issues seem to me to be the result of limited bandwidth of the individual user.

Not to mention that Zoom is playing a significant role in tackling this coronavirus directly because the first condition for tackling it is that maintaining a safe distance is the only way to win. In such a situation we should all maintain a safe distance and in order to maintain a safe distance we must come forward to each other. There are educational institutions like this because everyone is able to use this app while sitting at home, maintaining a safe distance and maintaining social distance, which takes into account the current situation in a particularly important field. On the one hand, many health workers around the world are directly cooperating to deal with the situation. In the same way, he is always by our side and cooperating directly. Therefore this contribution of Zoom in Corona situation is undeniable.

So last but not least, this is playing a special role all over the world considering the situation because this app allows you to maintain social distance very smoothly which is the most important thing in this situation. The role of the Zoom app in dealing with this coronavirus in any educational institution or any business or personal life is undeniable. It can. So let's all maintain a safe distance and keep our work organization active by using the zoom app and use the zoom app to deal with this risk. It can be said without hesitation that Zoom is an important present time and current situation.

End.
